

huntos

One share for every person on earth.

PITCH DECK · 20 OCTOBER 2026

THE PROBLEM

People create the value. Someone else keeps it.

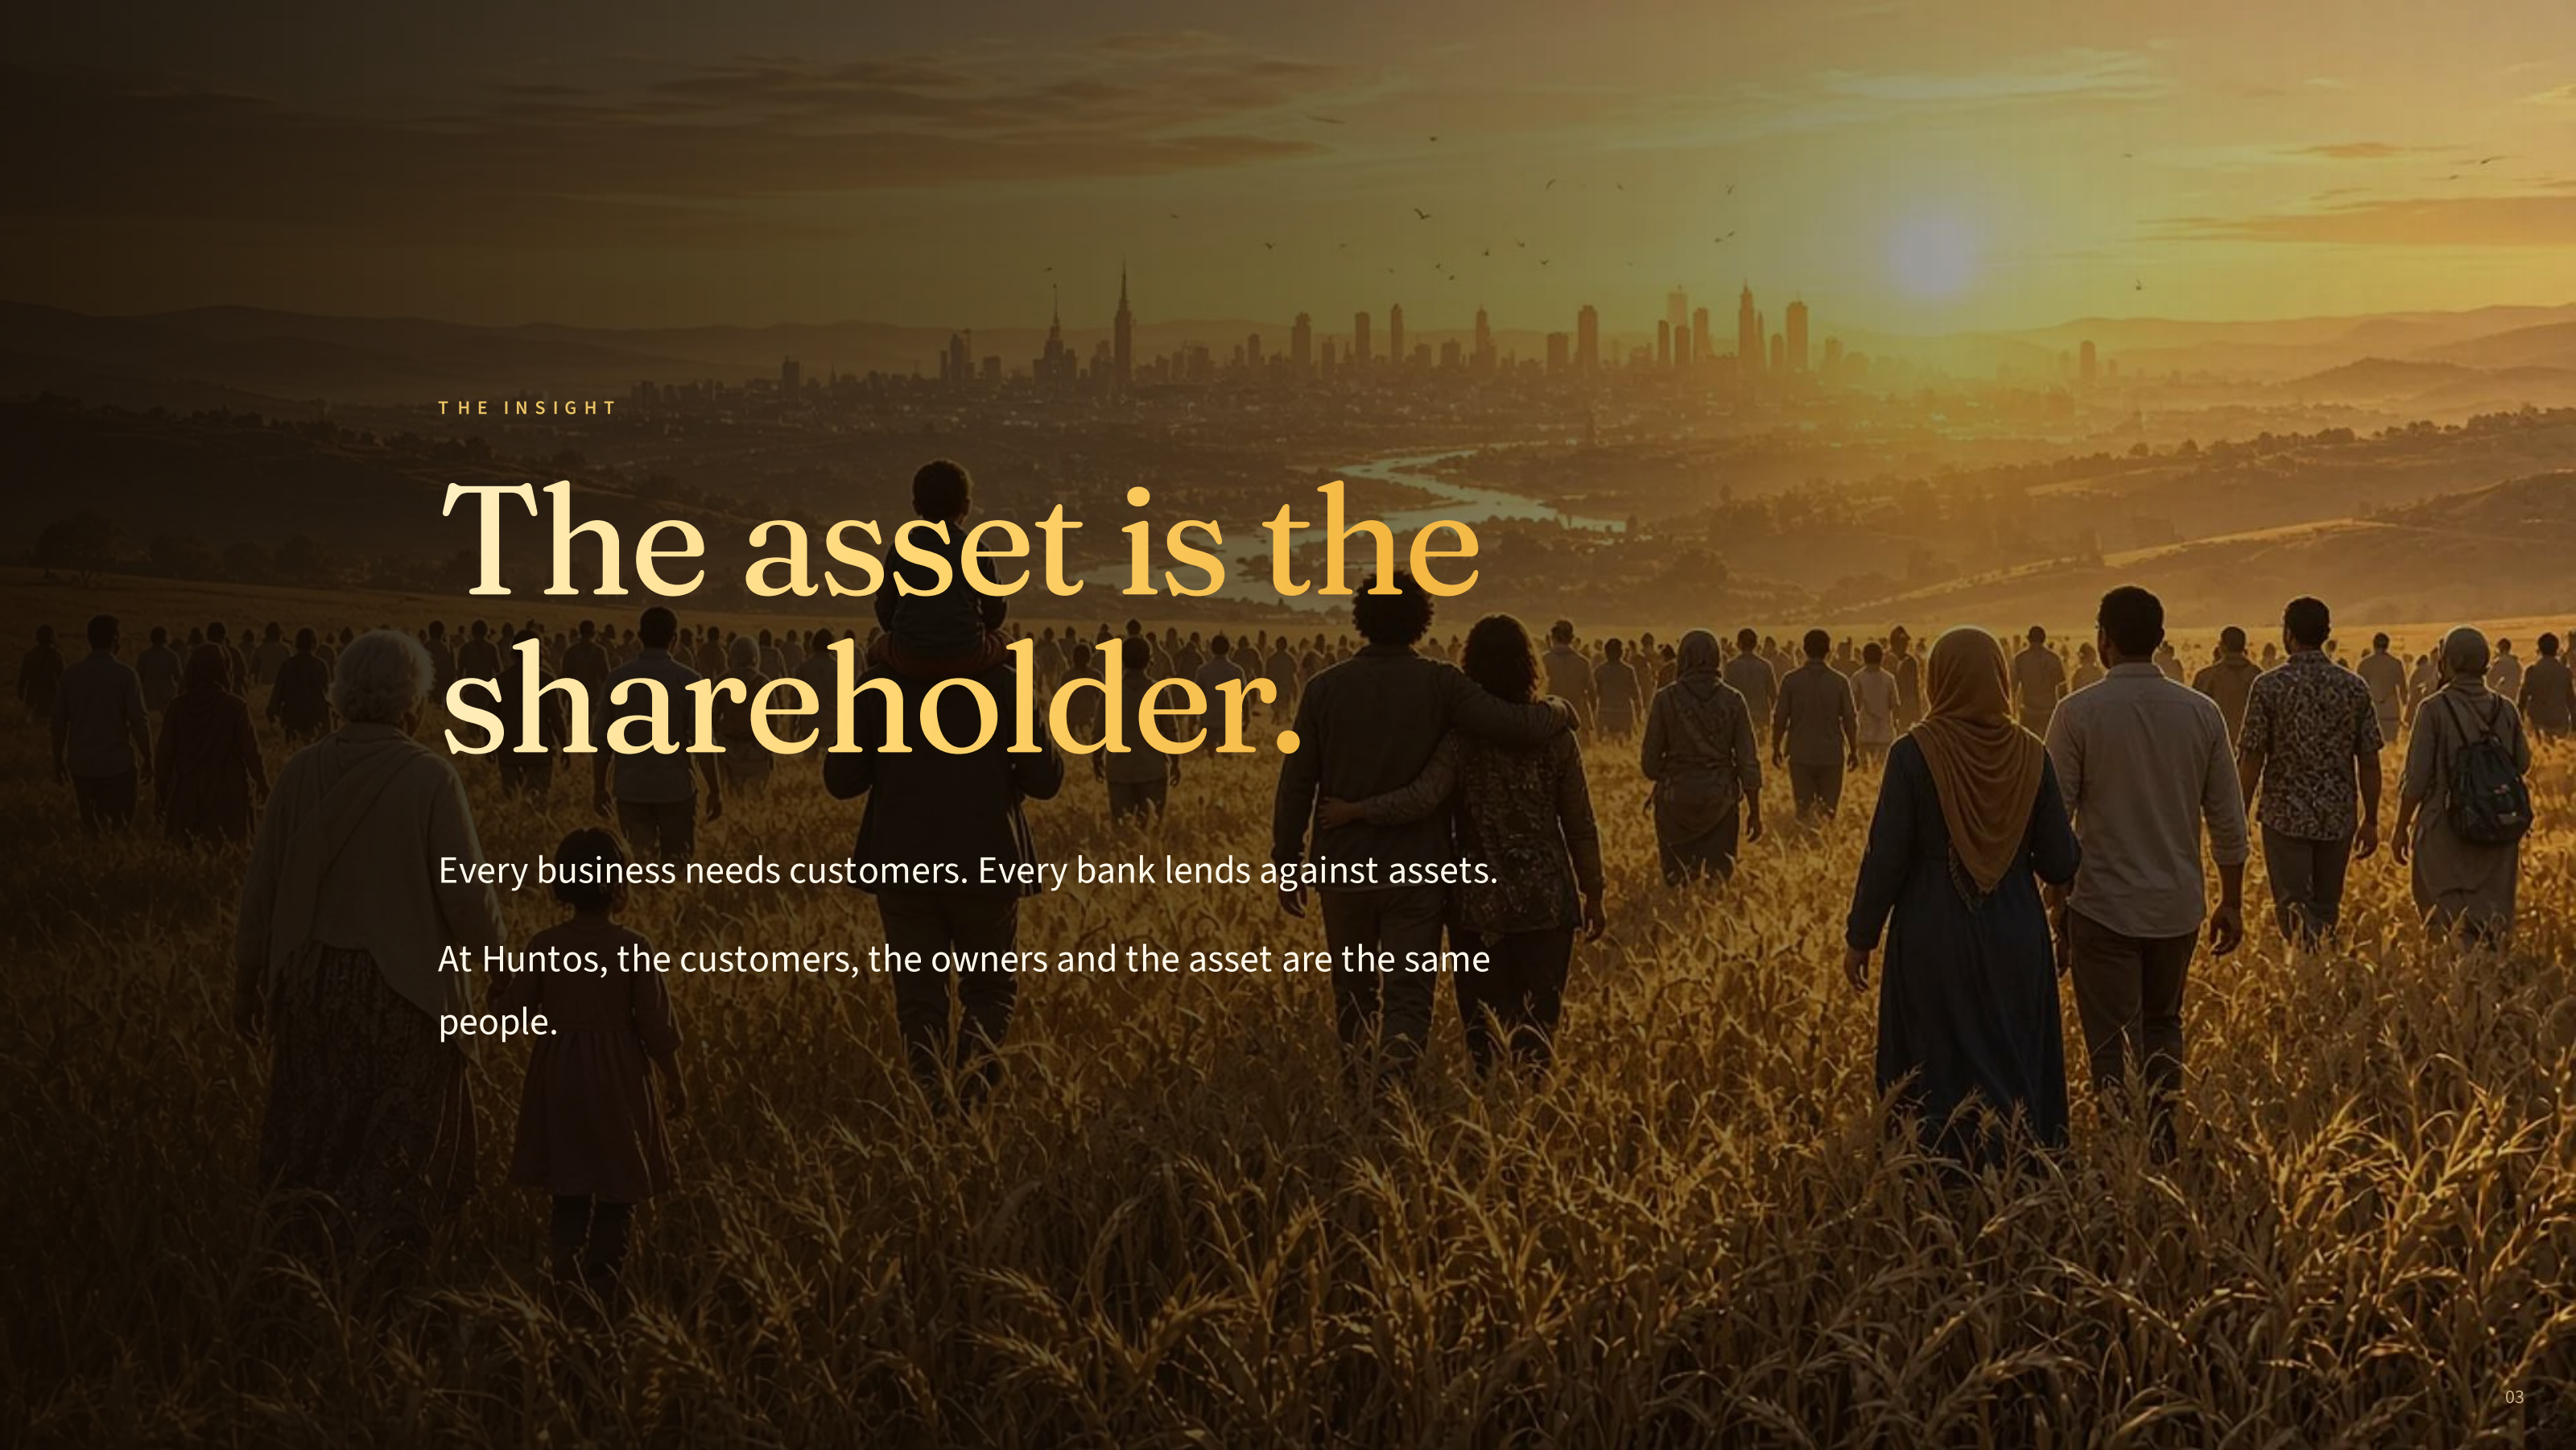

\$56

earned each year from every daily user by one platform alone (Meta, 2025)

\$737.3T

the value of the world's human capital — 64% of all wealth on earth (World Bank)

Most people own nothing of the companies that profit from them.

THE INSIGHT

The asset is the shareholder.

Every business needs customers. Every bank lends against assets.

At Huntos, the customers, the owners and the asset are the same people.

THE PRODUCT

One numbered share for every adult.

01 9,000,000,000 shares — enough for everyone

02 One per person, at no cost to claim

03 Cannot be bought, sold or pledged

04 Held in trust until the owner is verified

05 Dividends paid to each member’s Huntos Account

06 Unclaimed shares held in trust, never sold

HOW VALUE IS CREATED

Members in. Value out. Back to members.

01

Members claim

Every claimed share adds a person — a customer and an owner — to the asset.

02

Huntos invests

Usually 5–15% stakes in businesses that gain Huntos members as customers; capital raised on the strength of the membership.

03

Value comes home

Profits from those stakes can be paid as dividends — one share, one equal part.

THE MARKET

Everyone.

8.2 billion

people alive (World Bank, 2025)

6.2 billion

aged 15 and over

\$63.2T

household spending every year

\$118.4T

world output (GDP, 2025)

WHAT A PERSON IS WORTH

Four measures, four sources.

\$2.3M

what society pays to prevent one death (US DOT, world-adjusted)

\$102,507

lifetime earnings power (World Bank)

\$229,267

lifetime household spending, present value (World Bank)

\$56

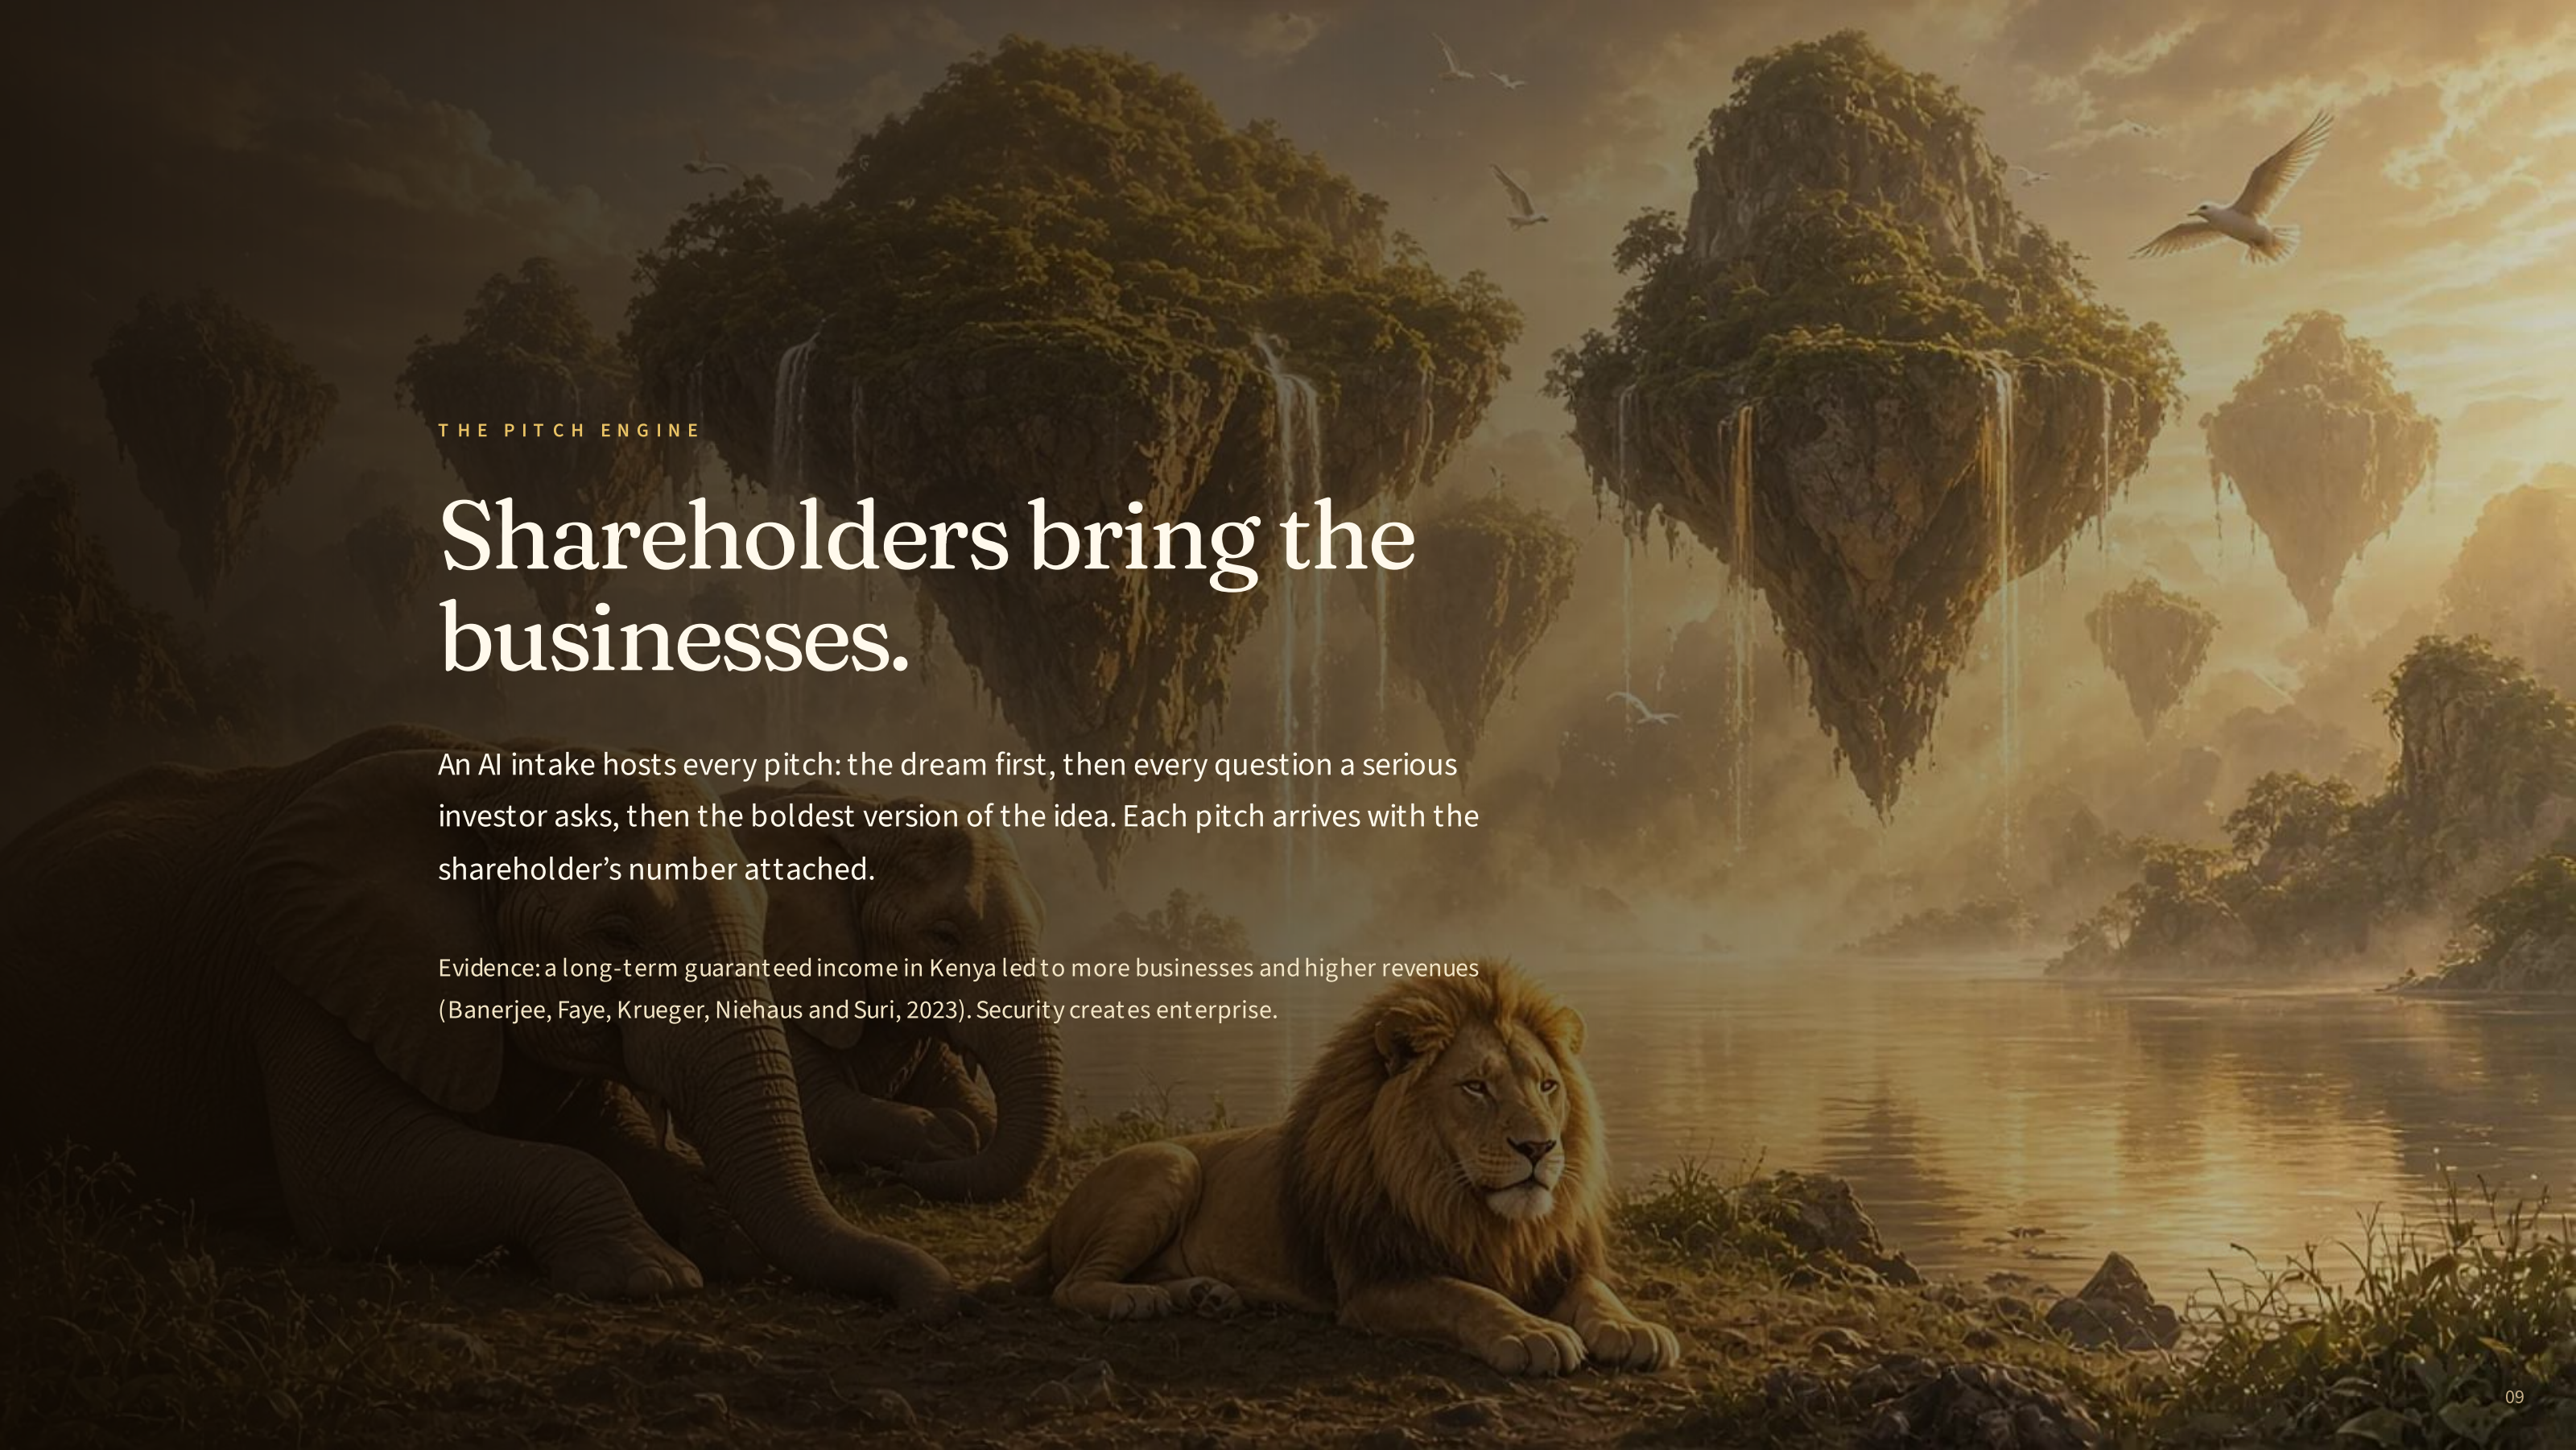

taken each year by one platform (Meta)

WHAT EACH SHARE ADDS

Each claimed share raises the value of the whole.

MEMBERS	FLOOR \$56 · one year of a platform's revenue per person	BENCHMARK \$422 · platform profit per person at 25× earnings	AMBITION \$1,025 · 1% of lifetime earnings power
1 million	\$56.1M	\$422.2M	\$1.0B
100 million	\$5.6B	\$42.2B	\$102.5B
1 billion	\$56.1B	\$422.2B	\$1.0T
Everyone 15+	\$348.6B	\$2.6T	\$6.4T

Illustrative model — not a valuation of any share, not a forecast, not an offer.

The background of the slide is a fantastical, cinematic landscape. In the foreground, a lion and an elephant are resting on a grassy bank. The lion is on the right, looking towards the right, while the elephant is on the left, partially obscured. In the background, there are several large, floating islands or rock formations, each with lush green vegetation and small waterfalls cascading down its sides. The sky is filled with soft, golden light, suggesting a sunrise or sunset, with a few birds flying. The overall mood is serene and majestic.

THE PITCH ENGINE

Shareholders bring the businesses.

An AI intake hosts every pitch: the dream first, then every question a serious investor asks, then the boldest version of the idea. Each pitch arrives with the shareholder's number attached.

Evidence: a long-term guaranteed income in Kenya led to more businesses and higher revenues (Banerjee, Faye, Krueger, Niehaus and Suri, 2023). Security creates enterprise.
